Profile

I'm a developer passionate about what I do and I consider myself a flexible and determined person. I often say that "those who do what they like live on vacation". That's why I'm always learning something new that helps me to be a better and better developer and professional. I have 3 years of experience creating projects both in the back-end and in the front-end, using **Python, React Native, HTML/CSS3, MySQL, NodeJS, JavaScript, TypeScript, Bootstrap 5** and I'm currently studying **Python** and **PySpark** to specialize in **Data Science**.

Professional history

- Ever since I got interested in programming, I've been constantly studying to get my first opportunity. For 3 years I've been developing several projects to put all my knowledge into practice and I'm sure I'll join your team of programmers. I have ease of learning, good communication and at all times I seek to improve myself more and more.
- HOSPITAL CIRURGIA
Administrative agent - OPME
(*Orthoses, Prostheses and Special Materials*)
Currently since 06/2021
- UNINASSAU
Student service - 01 year
- CONDOMÍNIO CLUBE ATALAIA
Administrative assistant - 09 months
- LOJAS AMERICANAS
Sales Promoter - 1 year and 09 months

Soldier - 1 year and 4 months
- IMPERIAL CONSTRUTORA E EMPREENDIMENTOS LTDA
Young apprentice - 2 year

Education

University - Uninassau - Aracaju

Systems Analysis and Development - *Completion in 2023*

Extracurricular courses

- Python 3 From Basic To Advanced - Udemy
- Introduction to Apache Spark with PySpark - Udemy
- Bootstrap 5 Basic - Udemy

Featured project

Task Optimization

Link: https://github.com/pedrohrs23/task_optimization

Back-end creation in Python for the optimization of important tasks related to the financial part of the company, in the extraction and organization of data. This project already operates monthly and is in the maintenance phase. I am developing applications to improve the Front-end with the tkinter library.

Technologies

React Native (Studying), HTML/CSS3, MySQL, Github, NodeJS, JavaScript, TypeScript, Power BI, Bootstrap 5, Python and PySpark (Studying).
